SUMMARY

Total 4+ years of experience in Software Engineering. Experience in Microservice, Frontend, Backend, Full-Stack, including all professional proficiency and below.

SKILLS

Web Technologies: JavaScript, React.js, Node.js, TypeScript, Next.js, HTML, CSS, ES6, RESTful API, Tailwind, Shadcn, Tanstack Table, TanStack Query
Backend: NestJS, NodeJS, PostgreSQL, MongoDB, MySQL, Redis
Databases: MySQL, MongoDB, Redis.
Technical: Jira, Azure DevOps, Git (Version control system), Github, Postman, Figma, MVC Architecture.

WORK EXPERIENCE

Simplify Healthcare **Pune, India**
Software Engineer *Oct 2024 – Present*

- Developed **IntegrateX**, a scalable Low-Code **Workflow Automation Platform** using **Reac.js**, **Typescript**, **Shadcn**, **Tailwind CSS**, and **Vite** on the frontend, with **.NET Core** and **Node.js** services deployed on **Azure Kubernetes Service (AKS)**, enabling users to visually design, configure, and execute complex integration workflows.
- Reimagined the data integration framework by building a **low-code ETL workflow** engine (similar to **N8N**) using **React Flow**, enabling users to configure complex Event-Driven, HTTP, and Data-Pipelines through a visual interface.
- Architected an **AI-powered** code editor using **Monaco Editor**, integrating **Azure OpenAI APIs** to provide intelligent code completion and **Copilot**-like features, which increased developer productivity by **30%** through real-time diffing and automated commit history.
- Engineered a **Dynamic Form builder** and **integration engine**, autonomously leading the development of a platform-wide **Data-Driven UI** utilizing runtime **Zod** schema validation
- Develop **TranslateHub**, an **AI-powered** translation solution, integrating **Meta** open source **NLLB module** to streamline document translations across multiple languages, reducing translation costs by **40%** and turnaround time by **50%**, utilizing **React.js**, **JavaScript**, **Dot Net**, and **Python.**
- Collaborates with **cross-functional teams** and **clients** to gather requirements, provide **technical solutions**, and ensure timely project milestone **delivery**, achieving a consistently high **client satisfaction** rate.
- Facilitated the end-to-end release process using **Azure DevOps** and **Docker**, managing **CI/CD pipelines** and containerized artifacts to ensure consistent, reliable deployments across staging and production.

Tata Motors **Pune, India**
Software Engineer *June 2022 – Oct 2024*

- Led development of a **Data Analysis System** (**JavaScript**, **React.js, Node.js, Next.js**) reducing costs and effort by **50%** and boosting user engagement by **70%**.
- Developed a real-time monitoring system (**SCADA**) using **JavaScript** with **React.js**, utilizing a **RESTful API**.
- Optimized multi-tab layout performance via **lazy loading** and **memoization**, effectively **debugging** and **troubleshooting** data plotting accuracy bottlenecks on **tables** and **charts** improving user retention by **30%**.
- Collaborated with team members and stakeholders on architectural and design decisions for system **UI**, **libraries**, and **frameworks**.
- Awarded **Rising Star** and **Recognition Master Award** for significant contributions to the company's growth.

PROJECTS

Next-Stream *February 2022 – May 2022*

- Developed a next-stream using **Next.js** and **React.js**. Integrating **RESTful API** for seamless video streaming
- Utilized **Node.js** for server-side functionality, potentially including data fetching or authentication.
- Leveraged **MongoDB** for potential user account management or video history tracking.
- Deployed the website on **Vercel** for a scalable and reliable user experience.

CERTIFICATIONS AND AWARDS

- Certified in **Postman API** from the Postman Expert Program offered by **Postman**.
- Certified in **Google UX Design Professional Certification** from Coursera developed by **Google**.

EDUCATION

MIT World Peace University **Pune, India**

- *Bachelor in Computer Application,* *CGPA: 9.94/10* *August 2019 – May 2022*
